

Alchemy Ascent*

An Algorithm-Based Investment Approach

In the current investment world, it is believed that the key to any successful investment strategy is in finding the “right stock”, the “right theme”, the “right sector” and the “right cycle”. Even the most experienced investors are prone to biases which are inherent in the investing process. This results in inconsistent alpha generation.

• However, we believe that building a high-performance portfolio involves much more. Stock allocation, its relative ranking in the portfolio and timing along with risk controls, also play a very important part of the alpha generation process. We believe in strong data-based research process, which considers all sources of alpha generation comprehensively, thus helps in creating an unbiased disciplined investment approach – a key to successful and consistent investment outcomes.

• **Alchemy ASCENT^^** endeavors to provide a consistent “high alpha” investment strategy which build portfolios to deliver consistent outperformance over the long term, using an objective, back tested and data driven approach devoid of any biases.

KEY FUND TERMS

Investment objective^^: To generate long term risk adjusted returns

Philosophy & Strategy^^: A High-Risk High Return oriented strategy where capital allocation is as important as stock selection and which aims at generating long term return by investing in companies, using data intensive research driven investment approach, to identify companies based on various parameters such as growth, valuation, quality earning and balance sheet health.

Description of types of securities: Equity

Stock Selection Approach: Equity stocks are chosen for investment on the basis of 3 factors:

1. The company fundamentals, as reflected in reported numbers
2. Investment strategy research regarding various market cycles and
