## OUR INVESTMENT PHILOSOPHY

---

- We believe that consistent and superior long term absolute returns can be made across market cycles by investing in growth companies with good management teams.
- We like businesses which address large and growing external opportunities, have a competitive advantage in effectively exploiting those opportunities and have a scalable business model with higher-than-average Return on Capital Employed (ROCE) over the investment horizon.
- We believe that management teams are key to business success. We look for managements which have aggression, are aligned to business outcomes while simultaneously having respect for governance and capital allocation.
- While growth companies form the core of our portfolio, we also tactically invest in deep value opportunities and special situations that may appear due to and during market cycles.
